Principal, Alec Foong

Alec holds a MSc and BSc degree in Communication Systems Engineering, both awarded by the University of Portsmouth in the UK. He is also a graduate member of the Board of Engineers Malaysia (BEM). Prior to establishing Akiddos Educare & Learning, he was heading an academic department in a leading college in Penang. With 12 years of experience in the education sector, Alec is not only a competent teacher but also an academic professional who understands methodologies, learner needs, quality delivery and cognitive development. During his stint in the college he had also continuously attended professional development courses in the areas of quality management systems in education, outcome-based education, pedagogy skills, instructional design and framework for teaching. His educational background and years of experience make him an ideal candidate in helming a learning center for growing kids.

Fluent in English, Bahasa Malaysia, Mandarin and two local dialects, Alec is a people person and enjoys teaching and interacting with all levels of people. He is passionate on educating and nurturing the potential of children simply because he is a father himself and understands the importance of a child's growing years. Akiddos was set up to promote these values and to provide an avenue for working parents in Balik Pulau who want a conducive nurturing environment for their children.

Alec believes that " **No one should be left behind as all children should be accepted and nurtured**". Just as he embraces challenges, he will also challenge your child to bring out the best in him/her !
